Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on March 6, 2006 has been entered.

STATEMENT OF REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The most pertinent prior art known to the Examiner is listed on the forms PTO-892 and 1449, including the Information Disclosure Statement submitted on March 6, 2006. None of the prior art of record teaches, discloses or suggests a process for preparing detergent particles in the manner as those specifically recited. The present claims are found to be allowable for the same reasons set forth in the Notice of Allowability dated December 12, 2005 which is reproduced below for Applicants' convenience.

The incorporation of the limitations of claims 15 and 16, which were indicated to be allowable in the previous office action, to independent claims 3 and 4 respectively, renders independent claims 3 and 4 allowable for the same reasons set forth in the office action dated February 18, 2005. With respect to independent claim 1, the declaration under 37 CFR 1.132 filed September 19, 2005 is sufficient to overcome the rejection based upon Yamashita '516 or Yamashita '501 because Applicants have shown that the present invention as recited in claim 1,

in particular, wherein the mixing operation is carried out by using a mixer comprising agitation impellers of which mixing impellers have a shape of a paddle, wherein the agitation impellers have a Froude number of from 0.5 to 4 and wherein the mixing operation is carried out under mixing conditions so as not to rotate the disintegration impellers, provide unexpected degree of particle growth when compared to the process of Yamashita '516 or Yamashita '501. Likewise, the obviousness-type double patenting rejection of claims 1, 3-13 based upon US Patent No. 6,602,846 in view of Yamashita '501 is withdrawn in view of Applicants' arguments. Accordingly, the subject matter, as a whole, would not have been obvious to one of ordinary skill in the detergent art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lorna M. Douyon whose telephone number is (571) 272-1313. The examiner can normally be reached on Mondays-Fridays from 8:00AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Douglas McGinty can be reached on (571) 272-1029. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
